ISSUES IN CONTEMPORARY EAST ASIA

PROJECTING THE FAMILY-NATION GLOBALLY: A (RE)ANALYSIS OF CCTV'S SPRING FESTIVAL GALA

Date: Thursday, February 20, 2014
Time: 12pm
Location: Room 500 of the Annenberg School for Communication (3620 Walnut Street, Philadelphia)

For more than 30 years, the annual variety show on Chinese Central Television (CCTV) called Spring Festival Gala (Chunwan) has been a state-sponsored enactment of the Chinese nation. For its 2014 installment, some major "innovations" were promised, including its alleged official designation as a "national project" comparable in status to the 2008 Beijing Olympics. Analyzing the texts and paratexts of the galas in sample years, this paper demonstrates some key discursive features of this show. Beamed globally via the satellite and Internet, the gala creates a trans-territorial enactment of festivity that all those of the Chinese origin around the world participate in. By invoking the vernacular notions of ancestors, blood ties, family relations, and home, and by iconizing widely familiar physical objects into symbols of the Chinese nation, the gala essentializes not only the Chinese nation but also the Other and China's relationship with the Other. Through the performances and carefully created montages of pre-recorded images, the gala weaves the cultural cosmos of China. In it, China is a cultural empire; the Chinese nation is a family with a common ancestor; the admission into the Chinese nation comes from submission to the blood tie and engagement in the "Chinese" cultural practices; and the communist state is the home that guards the common ancestor and shelters all family members. With the state's investment in its annual production, the gala is much more than a cultural product marketed globally. It is also a key site for the state-sanctioned discursive project of constructing the Chinese nation and projecting China's "soft power." It enacts the cultural imagination that is propagated as a basis for how China must play her role in globalization. The alignment of the the state's stake in interpellating its subjects and projecting its power and the commercial interests of CCTV as a state-owned profit-generating corporation is safeguarding its continuation in today's new media environment.

To protect Japan from yet another monster attack, this time from a new and malevolent member of the Godzilla (Gojira) species, the Japanese government creates a human-piloted cyborg, codenamed Kiriyu, using the skeleton of the original Godzilla (Gojira) that attacked Japan in 1954.

Have Abenomics put Japan once again on the road to global economic prominence? Or will the apparent success of Abe's policies prove to be short-lived?

Disasters and Rebuilding in Japan: Perspectives and Testimonies from the Tri-Co Collection

Date and Location: Bryn Mawr College, Canaday Library, Dec. 5, 2013 - March 7, 2014

This exhibition reflects the collaborative efforts of the Bryn Mawr 360° program Perspectives on Sustainability: Narratives of Disasters and Rebuilding in Japan. 360° programs are unique educational experiences designed to expand beyond the boundaries of the classroom and bridge between disciplines and communities. Usually taught in clusters of two or more courses, 360° programs cultivate in-depth and interdisciplinary scholarship, collaborative research, and creative community interaction. For Perspectives on Sustainability, participants enrolled in three course all focused on the history of disaster in Japan. Under the guidance of Bryn Mawr College Professor Carola Hein (Growth and Structures of Cities) and Swarthmore College Professors William Gardner (Japanese Modern Languages and Literatures) and Tomoko Sakomura (Art), the 360° students focused their research on four catastrophic events: The Great Kanto Earthquake of 1923, the 1945 Atomic Bombings of Hiroshima and Nagasaki, the Kobe Earthquake of 1995, and the triple disaster of March 11, 2011.

Students considered the historical impact of these disasters through their representation in Japanese art, literature and documentary film, and the effected changes and continuities in urban form and architecture. Additionally, the 360° participants grounded this larger history through primary research in the Tri-College archives and collections. This exhibition is the culmination of the students' joint efforts and explorations. Focusing on the time periods surrounding these four major disasters, the exhibit traces the lasting relationship between the Tri-College community and Japan. In three sections, the exhibit includes thematic panels addressing pertinent scholarship, a timeline of important bridges between Tri-Co and Japan, and a selection of objects from the college collections, all of which testify to the resilience of Japanese culture and the importance of remembrance, reflection, and the extension of communities beyond the boundaries of nation.
