*** CSCC Friday Forum: "The Political Process of Chinese Land: Partial Reform, Vested Interests and Small Properties" - talk with Shitong Qiao**

Date and Location: Friday, March 21 at 2pm in the CSCC Conference Room, Fisher-Bennett 345

Shitong Qiao, J.S.D. Candidate, Yale Law School; Research Scholar,
U.S.-Asia Law Institute of New York University School of Law.

This article investigates the history of land use reform in China and

proves that the so-called rural land problem is the consequence of China's partial land use reform. In 1988, the Chinese government chose to conduct land use reform sequentially: first urban and then rural, which made local governments in China the biggest beneficiary and supporter of the partial reform. However, a beneficiary of partial reform does not necessarily support further reform because of the excessive rents to seek between the market of urban real estate and the government-controlled system of rural land development and transfer. The central government, in particular its agency in charge of land administration (the former Bureau of Land Administration, which has been elevated to the Ministry of Land and Resources), also has interests endowed in this regime. In contrast, losers of this partial reform, Chinese farmers and other relevant groups, have no voice or power in the political process of the reform, which makes it difficult for the central government to achieve an agenda that balances interests of all relevant parties. However, this is not to say that a country, even without a democratic political structure, would necessarily be trapped in the partial reform equilibrium. In the China case, Chinese farmers challenged the existing system through forming a huge small-property market, around which social groups disadvantaged by the partial reform, mainly Chinese farmers and middle-and-low income urban population, present their interests claims and their ability to jeopardize the purposes the central and local governments hope to achieve through the existing system. This has led to adaptive policy changes.

“Japan at the Brink: Precarity of Youth in Films of Disaster and Dystopia”: A series of four films presented at the Bryn Mawr Film Institute

Date and Location: Mondays (March 3, 17, 24, and 31) at 7pm at the Bryn Mawr Film Institute

Selected to represent a range of forms and moments in Japanese cinema history this series curated by local Tri-College students takes as its theme the depiction of Japanese youth during social upheaval in real and imagined worlds. "Precarity of youth" refers to children's roles in these momentous times. Shifting between positions of vulnerability and influence, children in these films tell stories displaying contradictory points of hope and hopelessness. While the extensive record of natural and man-made disasters has altered Japan's landscape, the impact of disasters on younger generations is revealed as a mechanism of social critique and potential transformation.

Call for Proposals: "Inter-Asian Urbanity: Connections and Comparisons" by Hong Kong Institute - *Deadline: Monday, March 31, 2014*

The Hong Kong Institute for the Humanities and Social Sciences at the University of Hong Kong would like to invite Research proposals for "Inter-Asian Urbanity: Connections and Comparisons," an one week Advanced Training Program to be held in Hong Kong on August 18-24, 2014.

THEME

Asian cities have undergone centuries of growth and decline, social transformations, political strife and cultural fusion. They also present diverse paths to engage the global political economy in the 21st century. As in the past, the re-emergence of a vibrant and inter-connected Asia sees the region's urban populations mobile and growing. They are culturally diverse, at times volatile in their emotions and challenging in their claims for entitlements. The program attempts to use different disciplinary frameworks to position cities at global crossroads of trade and finance, politics, culture, and ethnicity, and to understand people's strategies for survival and advancement as urban spaces are reconfigured. Speakers will involve historians, anthropologists, political scientists, urban designers, architectural scholars, sociologists, and film-makers. We shall reinforce the program with field trips, one on Hong Kong as a colonial, multi-ethnic hub, the other on contemporary cross-border logistics. A documentary film on new immigrants and community building will complement the trips. This utilizes the unique assemblage of the Hong Kong region, in historical and contemporary terms, to illuminate the analytical themes we would explore across disciplines.

The program is free of charge. Room and board in Hong Kong, as well as local trips related to the program will be fully covered by the organizing institutions. A very small number of outstanding trainees may be selected to spend a year in residency as a visiting scholar at the Harvard-Yenching Institute in Cambridge, Massachusetts.

Applicants: Junior faculty members; PhD candidates, Deadline: March 31st

Call for Papers: The Center for Japanese Studies at UC Berkeley's First Annual Graduate Conference on Ecology and Space - *Deadline March 15th, 2014*

UC Berkeley's Center for Japanese Studies, with support from the Japan Foundation, is pleased to announce its first annual graduate student conference. This conference brings together prominent scholars and graduate students from all disciplines in the field of Japanese Studies to discuss the concepts of ecology and space from pre-modern times to the present. Space here not only connotes the physical, but also how one views one's position relative to others and to objects in the world. Resisting the objectification of nature as mere symbol or metaphor, the concept of ecology insists on new modes of reading, writing, and thinking about the material environment that connects the human to the organic world. The international dimensions of ecological questions are particularly suited to considering Japan within the broader fabric of the global environment. Within this general thematic area, we encourage submissions from a variety of disciplines that address diverse substantive topics, including comparative or cross-disciplinary studies on issues such as: natural disaster, geopolitics, human geography, agriculture, urban space and ecology, architecture and the environment, film and visual art, literary ecocriticism, environmental aesthetics, environmental history and soundscape and affect studies.

Please visit the website for submission guidelines and conference details. The deadline for abstract submissions is **March 15, 2014**. Conference invitees will be notified by email by April 1. Successful applicants should submit final papers to cjsgradconference@berkeley.edu by **April 26**.
